

Sales Dashboard for E-commerce Business

Project Management (How to distribute roles and manage the team, contain project timeline and milestone)

12-12-2024 / 14-12-2024: Data exploration and modeling
15-12-2024 / 17-12-2024 : Data transformation
18-12-2-24 / 22-12-2024 : Creation of Initial Visuals
23-12-2024 / 24-12-2024 : Create Dax measure and Final Demo Preparation.

Goal of project

Build an insightful dashboard to analyze sales data and provide actionable insights for sales improvements.

Data Exploration: explore data dynamically, allowing for analysis and exploration to answer specific business questions.

Define Key Performance Indicators (KPIs): Identify and establish relevant KPIs such as total sales, total profit and average order value This will help track performance and measure success.

Data Visualization: Create compelling and informative visual representations of data to facilitate better understanding and decision-making

- **Visualize Sales Trends:** Aim to create visual representations of sales trends over time, allowing stakeholders to easily identify patterns, seasonal fluctuations, and growth opportunities.
- **Highlight Regional Performance:** Incorporate geographic visualizations to display sales by region, helping to identify high-performing areas and regions that may require additional support or marketing efforts.

Dataset description

Dataset has 5 tables ->

order Data: This includes transaction details such as order ID, date of purchase, total sales amount, unit price and profit , Analyzing sales trends can help identify peak purchasing times and overall revenue performance.

Customer Information: The dataset should contain customer demographics, including customer ID ,name and region.

Product Details: This section includes product ID, name and category.

Region Details : Data on regions include region ID, name.

Sales rep information :Data include sales rep name,id and hire date .

Dataset Preprocessing (Load Transform)

Visualization (Visuals)

- **Profit Margin Analysis:** A line chart showing profit margins over time.
- **Sales Rep Performance:** chart showing sales reps by their total sales.
- **Top products Category by total sales**
- **Time-Based Sales Analysis:**
 - o **Sales by day of the week** to determine peak days
 - o **Sales by time of day** (morning, afternoon, evening, night)

** Interactive Filtering & Slicers

- o Product Category
- o Region name
- o Sales Rep name

DAX Measures

New Measure :->

total sales : provides a snapshot of overall business performance

total profit : The net income after deducting all expenses from total sales

Profit Margin : It indicates the percentage of revenue that exceeds the costs of goods sold

average order value : Calculated by dividing total sales by the number of orders

Total Quantity Sold : total number of units sold over a period

New Column :->

'Time of day' Column based on 'Hour' column .

Conclusion

Build an insightful dashboard to analyze sales data and provide actionable insights for sales improvements.
